

## **Stanley F. Malamed, DDS**

**Dentist anesthesiologist; Emeritus professor of dentistry; Author**

Stanley F. Malamed is a dentist anesthesiologist and emeritus professor of dentistry at the Herman Ostrow School of Dentistry, located in Los Angeles, California, USA. In 1973, Professor Malamed joined the faculty of the University of Southern California School of Dentistry (now the Herman Ostrow School of Dentistry of U.S.C). Dr. Malamed retired from the university in 2013. Doctor Malamed has authored more than 190 scientific papers and 17 chapters in various medical and dental journals and textbooks in the areas of physical evaluation, emergency

medicine, local anesthesia, sedation, and general anesthesia.

In addition, Dr. Malamed is the author of three widely used textbooks, published by CV Mosby: Handbook of Medical Emergencies in the Dental Office (8th edition 2023); Handbook of Local Anesthesia (7th edition 2020); and Sedation - a guide to patient management (7th edition 2024) and two interactive DVD's: Emergency Medicine (3rd edition, 2018) and Malamed's Local Anesthetic Technique DVD (2004) (edition 2 - 2012). The textbooks have been translated into 22 foreign-language editions.

In his spare time, Doctor Malamed is an avid runner, exercise enthusiast, and admits an addiction to the New York Times crossword puzzle, which he has done daily since his freshman year in dental school

### **"The ABC Protocol: Making Pain Control More Comfortable, More Effective, and Safer"**

Friday, August 22, 2025 at 2 pm on the Main Stage

Patients do not want to experience pain during their dental treatment. Fortunately, local anesthesia forms the backbone of pain control techniques in dentistry. Local anesthetics are the safest and most effective drugs for the prevention and management of pain. Yet, on occasion, achieving profound anesthesia painlessly can be challenging. In this program we will discuss a means to making dental local anesthetic injections both more effective, more comfortable, and safer – the new A, B, C's of dental pain control. Articaine; Buffering (the local anesthetic 'on switch'); and Cold testing to ensure pulpal anesthesia.

#### **Learning objectives:**

On successful completion of this program the enrollee should be able to:

1. Discuss the advantages of articaine HCl compared with other dental local anesthetics
2. List 3 advantages of buffering local anesthetics
3. Discuss the protocol for the use of cold testing following local anesthetic administration

### **"Ten-minutes to Save a Life"**

Friday, August 22, 2025 at 3 pm on Stage Two

Life-threatening emergencies can occur anytime, anywhere and to anyone. Such situations are somewhat more likely to occur within the confines of the dental office due to the increased level of stress that is so often present. In this course Dr. Malamed will discuss the areas considered vital to a proper understanding of emergency medicine: prevention, preparation, and the basics of recognition and management. We discuss preparation of the office and staff, including a review of recommended emergency drugs and equipment. We will then review the basic management of common emergency situations.

#### **Learning objectives:**

On successful completion of this program the enrollee should be able to:

1. List and discuss the four steps in office preparation for medical emergencies
2. List and discuss the indications for the eight basic emergency drugs
3. Discuss the basic management of medical emergencies
